Summary

- Experience in all phases of Software Development Life Cycle (SDLC) using React, NodeJS, and Python.
- Hands on expertise in developing the Single Page Applications (SPAs) using React.js and Model View Controller (MVC) frameworks such as NodeJS/Express.
- Self-motivated, easily adaptable to new environments and ability to work independently as well as in small groups.
- Motivated to produce performant and robust software; highly passionate, curious about programming.
- Experience in understanding large and complex code bases, including API design techniques to help keep them clean and maintainable.
- Experience of building web sites using best practice techniques such as mobile first, responsive design, progressive enhancement
- Able to produce Javascript unit tests and ensure front-end code quality.
- Worked on developing the architecture of microservice models with various languages.

Professional Experience

Teaching Assistant- Coding Dojo

3/18 - Present

- Communicate empathetically with new learners
- Break down complex coding concepts into small manageable chunks

On Site Operations Manager- Systems Administrator Assistant

12/14- 17

- Worked with System Administration to develop applications for tracking expenses specific for each restaurant with ASP.NET and C#
- Managed SQL server databases to support operations.
- Created an online issue tracking system for managers.

Projects

Code Snippets- Technologies: React, Redux, Express, MongoDB, Node.js, ReactStrap, Heroku

Created a developer tool to help save useful code snippets. Used React to create a responsive design.

Daisy's Photo- Technologies: HTML5, CSS3, JavaScript, Bootstrap, Grid, Node.js

Designed and developed a responsive web app for a photo booth rental business resulting in customer increase by 170%.

Education

Jordan University of Science and Tech - B.S in Computer Information Systems

Languages/Frameworks

- JavaScript
- Python
- React.js
- Node.js
- Angular.js
- Django
- Express.js

Technologies

- HTML
- CSS
- SCSS
- Grid
- Flexbox
- Git
- Jest
- MongoDB
- SQL
- Redux
- Redis
- Context API

Knowledge

- Design Patterns
- Data Structures
- Database Administration
